

# FOREST ECONOMICS DEPARTMENT

## NEWSLETTER

Editors: Michael Jones and David Cope

No.9      Finnish Forest Research Institute      Helsinki 29.4.1970

---

### Colloquium

For those who manage to get to work on Monday after celebrating Vappu, the next meeting of the colloquium will be held. Kari Keipi will present some aspects of forest fertilization and Pentti Kuokkanen will discuss cost accounting systems used in forestry nurseries. Everyone is encouraged to come and learn a bit about what these two researchers are doing. Note: the meeting will be held at 14:00 in Kahvio, not in the conference room.

### Visit to Riihimäki glass factory

On Wednesday, May 13th there will be a trip to Riihimäki to visit the glass factory. As with the trip to Lohja, the visit is in conjunction with the Finnish government scholarship holders. The excursion will depart at 11:30 (eat before you go!). On the way back to Helsinki we will stop to see the new church in Hyvinkää and perhaps also Ainola. We plan to be back in Helsinki by 17:30.

### Working Saturdays

Since May is the month of holidays we have a couple of working Saturdays. Saturday the 9th is one to make up for Ascension Day on the 7th. Then Saturday the 23rd is another to compensate for Whitsuntide on the 18th. Thinking of all the work that gets accomplished on these days it is simply asking too much to even think about the possibility of having both the holiday and a free Saturday!

### New publications

Ervasti, Seppo, Lauri Heikinheimo, Kullervo Kuusela and Veikko O. Mäkinen. Forestry and forest industry production alternatives in Finland, 1970-2015. Finnish Paper and Timber, 21:3. Helsinki, 1970.

### Kajander leaves

Best wishes to Paavo as he leaves his position here and heads off to Paris for a while. Good luck and Godspeed, Paavo; don't forget to come back to Finland sometime!

Until a permanent replacement can be found, Kaarin and David will try jointly to fill Paavo's shoes. Let's hope the affairs of the department aren't in too big a mess by the time they get through trying to run things!
